Houston/Helen

Please replace the earlier version of the following with this one. Thanks.

Red Mill Road Drum Site, Fairburn, GA (Monsees)

On 02 March, 1993 R-1 Monsees was dispatched at approximately 1400 hours to the scene of three abandoned drums located near the intersection of Red Mill Road on Duncan Road outside of Fairburn, GA. The local FD was on scene and was requesting cleanup and removal assistance. GA EPD had declined to participate in drum removal and disposal activities purportedly due to a lack of funds.

The drums were found to be lying on their sides, and one was leaking a paint like viscous substance to the ground. Monsees issued Delivery Order Number 4001-F1-052 in the amount of \$10,000 to the ERCS contractor for emergency response and cleanup services.

The drums were overpacked. Contaminated soil was drummed and transported that night along with the overpacks to a local TSDF for storage until disposal arrangements can be made.

Contractor response costs, including disposal will be approximately \$5,000.

West Lee Mill Road Drum Site, Riverdale, GA (Monsees)

On 06 March, 1993 R-1 Monsees was dispatched at approximately 1930 hours to the scene of three abandoned drums located near the intersection of Lee Mill on West Lee Mill Road in Riverdale, GA. County EMA and FD personnel were on scene and were requesting cleanup and removal assistance. GA EPD had declined to participate in drum removal and disposal activities purportedly due to a lack of funds.

The drums were found to lying on their sides, and one was leaking an oily solvent like substance to the ground. Monsees issued Delivery Order Number 4001-F1-053 in the amount of \$10,000 to the ERCS contractor for emergency response and cleanup services.

The drums were overpacked. Contaminated soil was drummed and transported that night to a local TSDF for storage until disposal arrangements can be made.

Contractor response costs, including waste disposal will be approximately \$5,000.
